ROADMAP 2018/2019	25

INTRODUCTION:

→ ABSTRACT

It is noted that hundreds of new ICO projects raise millions of dollars but little is shared with the investors on how the raised fund is spent. Many of these projects simply disappear in thin air and with them millions of dollars. Some of them deliver a product that falls far short of what was promised, a product that simply has no practical utility or dysfunctional. Over 70% of all ICOs that raised funds in 2017 simply abandoned their projects and their issued coins/tokens became ghost ships in exchanges. The ONE SHARE addresses two main issues to be solved: First, to allow ICO investors to be part of all strategic decisions in all matters of the raised capital from day one. Second, to allow investors to have a share of the gains and success of the project.

→ CONTEXTUALIZATION

Blockchain technology has gradually been accepted and becoming standard in many sectors, its safety are exhaustively been tested in many ways, it is easy to imagine that blockchain has the potential to change banking standards of how things are done until today. Today a simple bank transfer from one country to another goes through a multitude of slow and expensive processes, often unknown even by bank agency managers.

Stocks Are Ownership Stakes, Bonds Are Debt

Stocks and bonds, sometimes called a debenture, represent two different ways for an entity to raise money to fund or expand their operations. When a company issues stock, it is selling a piece of itself in exchange for cash. When an

entity issues a bond, it is issuing debt with the agreement to pay interest for the use of the money. The primary *market*, also called the new issue *market*, is where issuers raise capital by issuing *securities* to investors. The secondary *market* also called *the stock* exchange facilitates trade in already-issued *securities*, thereby enabling investors to exit from an investment.

Stock Market And Blockchain

Stock Market and Blockchain technology are on a convergence and collision path. NASDAQ announced that it intends to work with cryptos in the second half of 2018, other platforms will follow and a new standard can be created. It is not difficult to imagine a brief future where the stock market will launch share papers in a blockchain pattern or facilitate the trade of company's securities with crypto. It could revolutionize the whole market as we know. It would facilitate the buying, selling and transfer, adding liquidity and security to the market, and as important as all this, a good synergy between crypto exchanges and stock market exchanges. Brokers would have to adapt to this new reality.

➔ INVESTMENT AND MUTUAL FUNDS

What Is A 'Mutual Fund'

A mutual fund is an investment vehicle made up of a pool of money collected from many investors for the purpose of investing in securities such as stocks, bonds, money market instruments and other assets. Mutual funds are operated by professional money managers, who allocate the fund's investments and attempt to produce capital gains and/or income for the fund's investors. A mutual fund's portfolio is structured and maintained to match the investment objectives stated in its prospectus.

Why Do People Invest In Mutual Funds Instead Of Investing Alone?

Mutual funds are actively managed baskets of stocks. It provides more diversification than an individual stock. There are a number of reasons why an individual may choose to buy mutual funds instead of individual stocks. The most common are that mutual funds offer diversification, convenience and lower costs. Investing in a single company has risk. If you invest the same \$500 in a mutual fund which have several stocks inside, if one company flounders, you would not lose your entire investment. Trading can be confusing, complicated and unpredictable. Markets are being controlled by Big Investors or “whales”, trading by your own sometimes downright a mess. it depends of the right timing and some studies of Technical Analysis (TA).

Why Do People Invest Alone Instead Of Investment In Mutual Funds?

When you invest in a mutual fund you place your money in the hands of a professional manager. The return on your investment depends heavily on that manager’s skill and judgment. Research has shown that few portfolio managers are able to outperform the market. Check the fund manager’s track record over a period of time when selecting a fund. Fees for fund management services and various administrative and sales costs can reduce the return on your investment. These are charged, in almost all cases, whether the fund performs well or not. Redeeming your mutual fund investment in the short-term could significantly impact your return due to sales commissions and redemption fees. It is usually something passive, putting capital in a fund and waiting. The allocation of the fund and the composition of the portfolio is often fixed and the investor does not participate in the decisions.

→ THE PROBLEM

Ico Entrepreneurs Raise Money And Deliver Very Little.

There are several good crypto projects that launch an ICO for a token or new blockchain technology, many of these projects raise millions of dollars conducting ICO and deliver very little to their initial investors. One of the major problems is the lack of investor participation. What do they do with all the millions dollars collected by ICO? None of these Groups behind these projects allows investors to have a share in the company's profits and decisions.

ICO Cashout For Fiat And Exit Scam.

Many of these ICOs cashout the entire ETH collected to fiat, bringing down the crypto market and devaluing the overall market. They often just disappear in what is known as the exit scam. They leave investors with a shitcoins in hands that from day to night, devalue 95% and become ghost ships in exchanges.

→ OUR IDEA AND PLAN

An Hedged Mutual Fund To Crypto Equity & Dapps Projects.

There are several groups of people/entite who come together to form investment funds to invest in others companies, startups, stock market, bonds. How about to form a democratic Mutual fund devoted to the crypto espectro?

To Invest In Anything In Crypto And Blockchain.

Our initial project to be developed is a decentralized voting and decision-making platform.

Why A Mutual Fund In Crypto?

Some banks have begun to offer, albeit timidly, funds in crypto. Large groups of investors of all kinds are starting to see the market's potential in crypto and funds are being formed by strides. The crypto securities market, the altcoins

market, has a great opportunity for profit, the market is maturing, and having funds invested in crypto is beneficial to the system.

Mutual Funds from Stock to Crypto.

A crypto mutual fund can not simply import how the stock market works, it needs to understand the particularities of this intense and never-sleeping market. Our aim is a constant sharing of information, exchange of ideas between investors and the team. We aim to create a democratic space where we can discuss the designs and products of different cryptocurrencies. Choose the most noteworthy projects to form a portfolio trade, the duration of a portfolio, objectives and targets. And most importantly, we adapt to the frequent oscillations that are usual to the cryptocurrencies market.

A Token To Share Decisions And Profits.

ONE SHARE combines a team of professional Traders and a community of thousands of people together to find the perfect experience. We intend to manage a crypto investment fund that benefits its investors.

As an investment fund, we intend to allocate resources in profitable projects, even if it is from third parties. A platform where individual can access to apply their idea, or project, with the intention of obtaining partnership to start, we will analyze all the proposals and discuss with the investors (holders) of the One Share token.

The central idea is to share the decisions and the realized gains with the investors. Much more than an Initial Token Offer to distribute ONE SHARE Token, our project aims to share the project's ownership with investors. Participating in our ICO is also having a share of the project, and with that, participate in the decisions and the gains. A decentralized enterprise.

THE ONE SHARE PROJECT:

→ BRIEF

Develop an advanced decentralized platform for decision-making and voting based in Blockchain. Run an ICO for distribution of ONE SHARE Tokens through a Ethereum Smart Ecosystem Contract to raise the largest mutual investment fund in cryptocurrencies. The entire resource collected will form a mutual fund called ONE FUND that will be managed by shared decisions of founders and investors, to the benefit all SHAREHOLDERS of ONE SHARE Tokens. The Foundation to be created to manage the fund will be totally decentralized and the decisions of the company decided by the investors by voting.

On the First phase of the project, ICO investors will receive the correspondent of ONE SHARE Tokens according to the amount invested and also rights of share of the ONE FUND realized gains and rights for voting in the decisions of the Foundation.

To the second phase of the project, investors are required to HOLD ONE SHARE Token in order to be able to participate in the share of the gains. The fund will be applied many profitable projects, in crypto securities (ALTCoins), third parties DAPPs projects, a rebuy program of One SHARE Token, a fund to list ONE SHARE Token in as many exchanges as possible and anything the investors decide in the crypto/blockchain spectrum. The central purpose is to share the decision and share the profits, it is mean, share the success of the investments with the SHAREHOLDERS of ONE SHARE token and at same time, make the fund to grow.

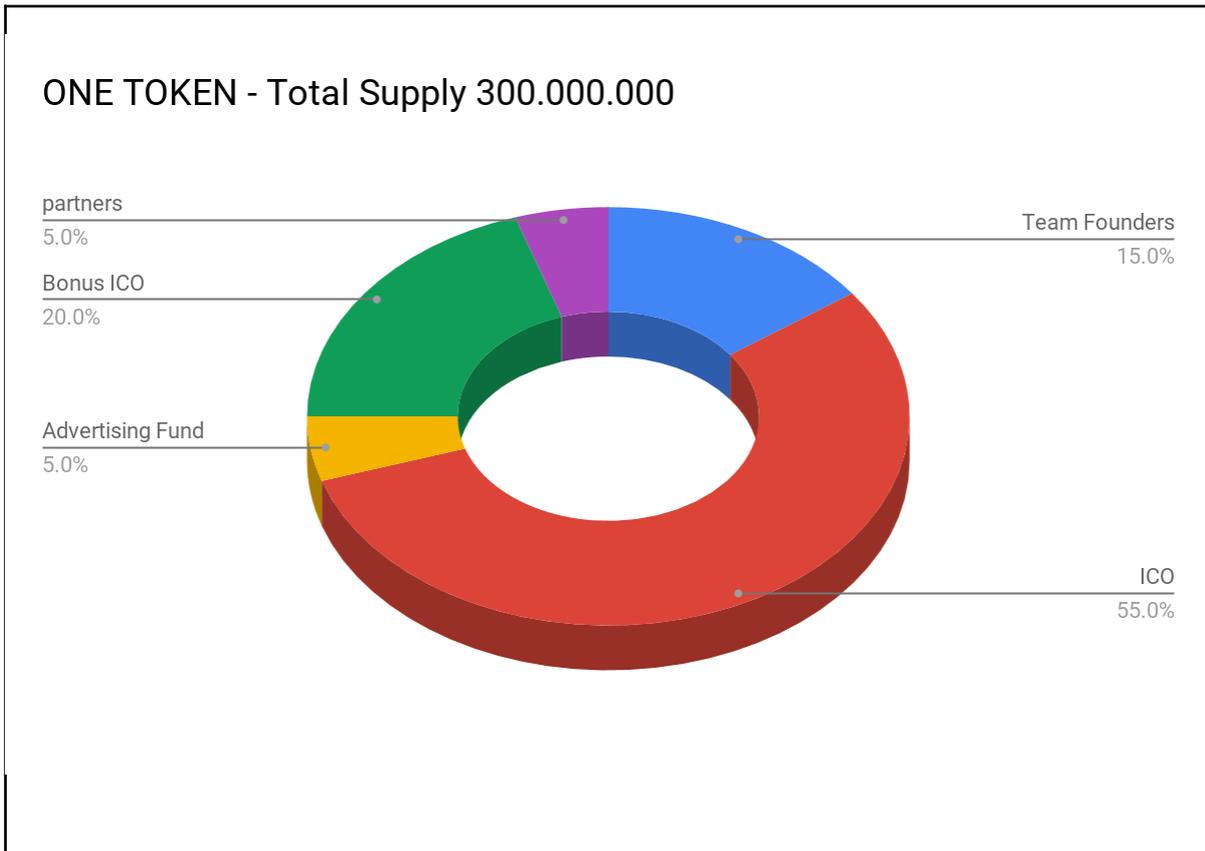

➔ ONE SHARE TOKEN

ONE SHARE is an ERC20 standard token, works just like any token of the ethereum blockchain network, can be transferred, stocked and hold in any ethereum wallet. The total supply will be 300,000,000. None ONE SHARE Token will be issued beyond the total supply. 55% of ONE Tokens or 165,000,000 will initially be offered exclusively by a Initial Coin Offering (ICO) and can be purchased exclusively with BTC, ETH, BCH, LTC, DASH, XRP.

ONE SHARE is a cryptocurrency and its price is not controlled or manipulated and depends explicitly on buying and selling in third-party exchanges against bitcoin, ethereum or even fiat currencies.

Hold ONE SHARE also means having a share in the One Fund Enterprise outieership, being able to vote in strategic decisions and receive profits. Each quarter of the year, the investment profits will be shared with all token holders. Holders will be treated as ShareHolders.

➔ THE INITIAL COIN OFFERING

All unsold token offered to the ICO will be burned after end of the initial coin offering.

The ICO price per token will be U\$ 0,04

Intended objectives (Targets) for the ICO:

SOFT CAP	SELL 25 millions ONE TOKENS
FIRST TARGET	SELL 50 millions ONE TOKENS
SECOND TARGET	SELL 100 millions ONE TOKENS
HARD CAP	SELL 165 millions ONE TOKENS

□ BONUS TABLES

ICO bonuses will be awarded according to the amount invested and others aspects:

BONUS ACCORDING THE ICO STAGE:		
Ico Bonus Stage	Duration	BONUS
First Stage	Until SOFT CAP reach	20%
Second Stage	To be decided	15%
Third Stage	To be decided	10%
Fourth Stage	To be decided	7%
Last Stage	To be decided	ICO Price U\$ 0.04

ADDITIONAL BONUS ACCORDING TO AMOUNT OF ONE SHARE TOKENS BOUGHT:			
Less than 8,000	Between 8,001 - 50,000	Between 50,001 - 500,000	Over 500,000
COPPER	SILVER	GOLD	PLATINUM
0%	5% more tokens	10% more tokens	15% more tokens
Additional Benefits			
Access to investor ONE FORUM	Access to investor ONE FORUM	Access to investor ONE FORUM	Access to investor ONE FORUM
Share in the profits	Share in the profits (1.15x)	Share in the profits (1.30x)	Share in the profits (1.55x)
Rights to Vote	Rights to Vote	Rights to Vote	Increased Voting rights

Buy Over 500,000 Tokens At First Stage Of Ico In Order To Get The Max Bonus Discount Of 35%.

➔ THE UNIQUE DAPP VOTING SYSTEM PLATFORM IN BLOCKCHAIN

Following a comprehensive planning, ONE SHARE aims to create an advanced Dapp voting platform in blockchain to share decisions with shareholders. The idea is to develop a platform or mainnet with the use of blockchain technology to create a reliable decentralized voting system for multiple purposes. This decentralized platform will be our most important project to be developed, easily accessible and may in the future be used by any group, company, foundation, who wish conducting searches, inquiry, study, polls by voting in a secure blockchain environment.

The first use-applicability will be in the decentralized decision making of the hybrid ONE Mutual FUND. This platform will help to manage a hybrid and decentralized governance company.

The idea is the creation of non-monetary units of blockchain, distributed by a network. the transfer of the non-monetary unit, represents the choices, among the options presented. At a user level, an app is easy to use as a mobile application, which guarantees you the full security of the blockchain in making important decisions or simply answering a survey.

The surveyor distributes the non-monetary unit of voting, according to the desired population, or for specific individuals - who must take decisions at the corporate level - and check the results and the choices are recorded in the public and transparent block.

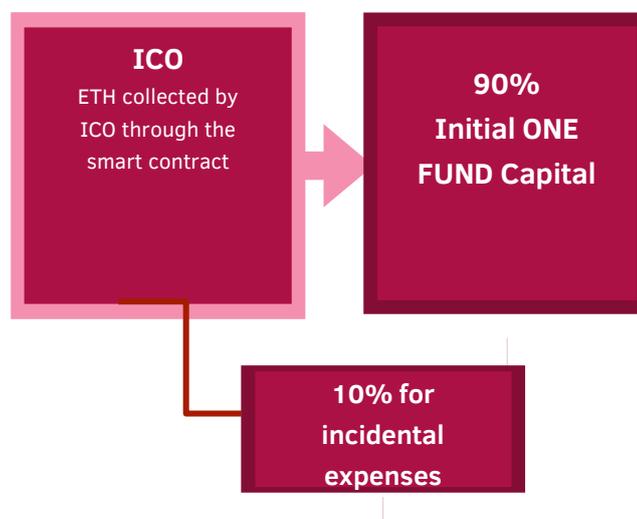

using a basis of Proof-Of-Burn, after the transfer of the non-monetary unit, there is the destruction of it.

The ONE FUND:

The capital raised by ICO of ONE SHARE will form the One Fund, holders of the ONE SHARE token have a share in the fund's ownership. All financial applications of the fund will be debated and decided collectively between the team and the shareholders. The ONE FUND will always be kept in cryptocurrencies, supporting the adoption of the market, benefiting the market as a whole

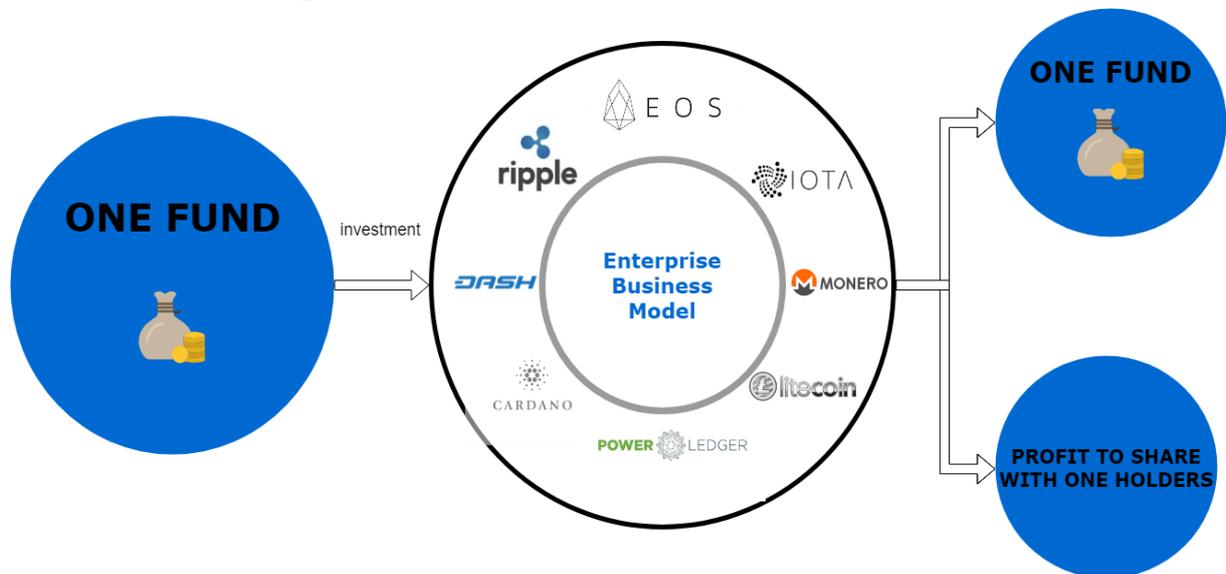

The initial capital of the Fund.

The initial capital to form the ONE FUND will be composed by the amount collected at ICO of ONE SHARE. will make up the initial capital of the fund 90% of the raised.

All the initial investment decisions of the fund application will be shared with the investors who participate in ICO or hold ONE SHARE Tokens. Information about all the investments will be published on the ONE FORUM platform available to ICO investors and holders. The fund will capitalize profit on each quarter (can be changed by decision of investors). For the first quarter the ICO investors will share the realized profit of the investments of the period, to the next quarters it will be necessary to hold ONE SHARE Coin (through a smart contract or other means or ESCROW) for the duration of the quarter. If there is a profit obtained in the period, it will be shared with ONE SHARE holders. Only the profits will be shared.

- **One Fund Investments.**
- **One Quarter Duration.**
- **Take Profits.**
- **Share gains With Holders Of One Share Token.**

* The crypto coins of this model are merely illustrative.

The fund will have several others purposes, from investment in crypto securities (ALTCoins) to investment in other crypto projects, such as exchanges, wallets, Apps, DApps, web applications, crypto BOTs, anything profitable in crypto spectrum.

The ONE Mutual FUND give to individual investors access to professionally managed portfolios of crypto securities. Each SHAREHOLDER, therefore, participates proportionally in the gains of the fund after a period of time. The ONE FUND will invest in a wide amount of securities, and performance is tracked as the change in the total market cap of the fund.

One Fund Management

The ONE FUND is also the name of the Foundation to be registered, is in the business of making investments. When an investor buys ONE SHARE token - in any exchange - he is buying part ownership of the ONE FUND Foundation. The holder has a share of ownership of the mutual fund and can claim the gains by holding it property. The fund will be applied mostly in securities cryptocurrencies (ALTCoins), but also in others projects in crypto and blockchain. All allocation/investment in ALTCoins will be discussed at ONE FORUM. Investors will have a voice and can share their opinion and vote when it be necessary.

➔ TRADING

The investments will follow the market, the duration of investments (trading crypto securities) will be dependent and decided for momentum, but aims at medium to long-term investment. Showing transparency, ONE Team will share daily/weekly information and balance of gains and losses for all the trades made, and disclosed at the ONE FORUM and other social medias. The main objective is to be the largest mutual investment fund in crypto securities, where investors have voting rights and a share of the ONE FUND's gains.

➔ SHAREHOLDERS PROTOCOL

By definition, shareholder is a person who owns shares in a company and therefore gets part of the company's profits and the right to vote on how the company is controlled.

When somebody buys ONE SHARE Token and holds it in our smart contract or other means available or ESCROW, becomes a SHAREHOLDER and gets part of the ONE FUND's profits, it means, is entitled to gain a dividend of ONE FUND's investments after some time. Everyone who acquires ONE SHARE Tokens in the ICO or later in exchanges is able to gain part of the profits of each quarter if holds the tokens for the time requested.

The Minimum Hold Time Required To Receive Net Income Of The Profits is 1 Month (30 Days).

It will be necessary to keep ONE SHARE locked by a contract or other means offered or ESCROW, it means, to agree to keep ONE SHARE for the time that the quarter lasts to have a share of the profits. At the end of each quarter, ONE SHARE can be redeemed back to Ethereum Address (investor address) and holders receive the SHAREHOLDER profit in ETH, BTC or even USDT according to the amount of ONE SHARE tokens that were locked.

➔ SHAREHOLDERS GROUPS

Benefiting long-term investors and more committed to ONE FUND, investors entitled to receive share of the profits will be classified by groups based on the amount of ONE SHARE Tokens they own and hold:

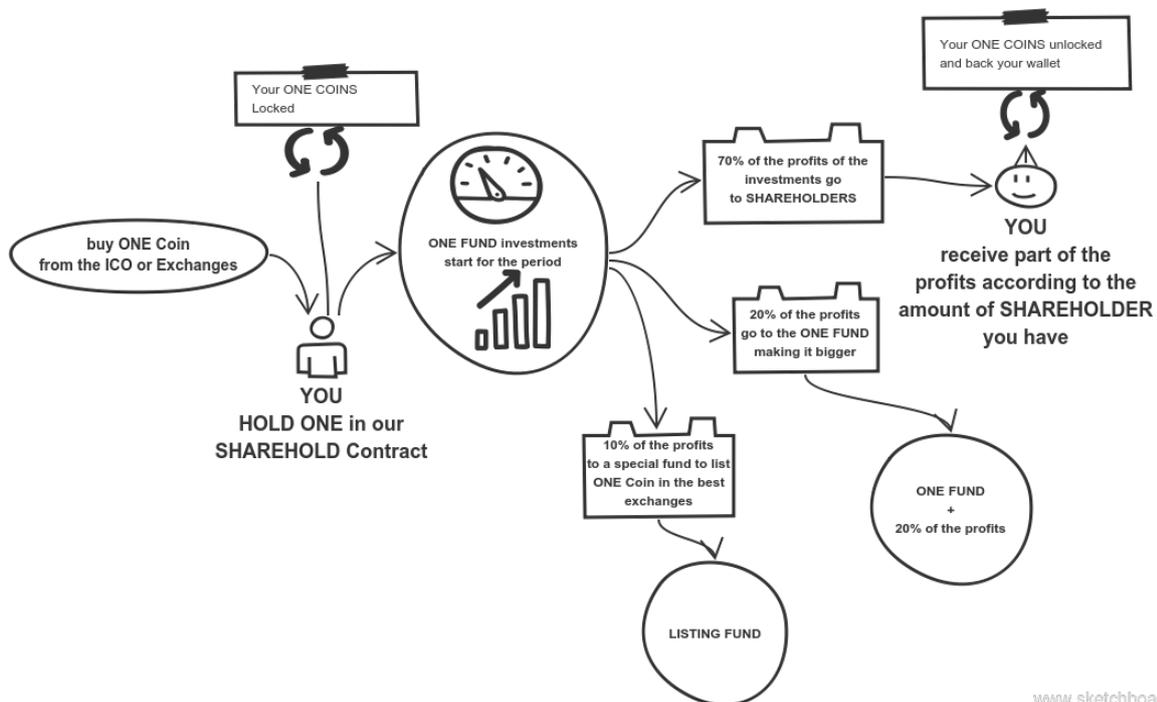

Group Membership	Amount Of One Share Tokens Holding	Participation In The Fund's Shares Gains.
COPPER	Less than 8,000	20%
SILVER	between 8,001 and 50,000	23%
GOLD	between 50,001 and 500,000	26%
PLATINUM	above 500,001 ONE SHARE TOKENS	31%

Future implementations, modifications of the SHAREHOLDER system may happen and will be debated and voted at the ONE FORUM. The focus is always to have a fair system where all SHAREHOLDERS gain.

➔ HOLD ECOSYSTEM

Hold is part of how the SHAREHOLDER Protocol works and how it can benefit investors. The profits are distributed after each period (Quarter) to all investors who have ONE SHARW tokens. To do so, investors needed to keep the tokens in their own wallets. Tokens kept in exchanges is not eligible to share of the profits. Instructions on how to proceed will be widely published on the website each quarter.

Make Money With ONE FUND

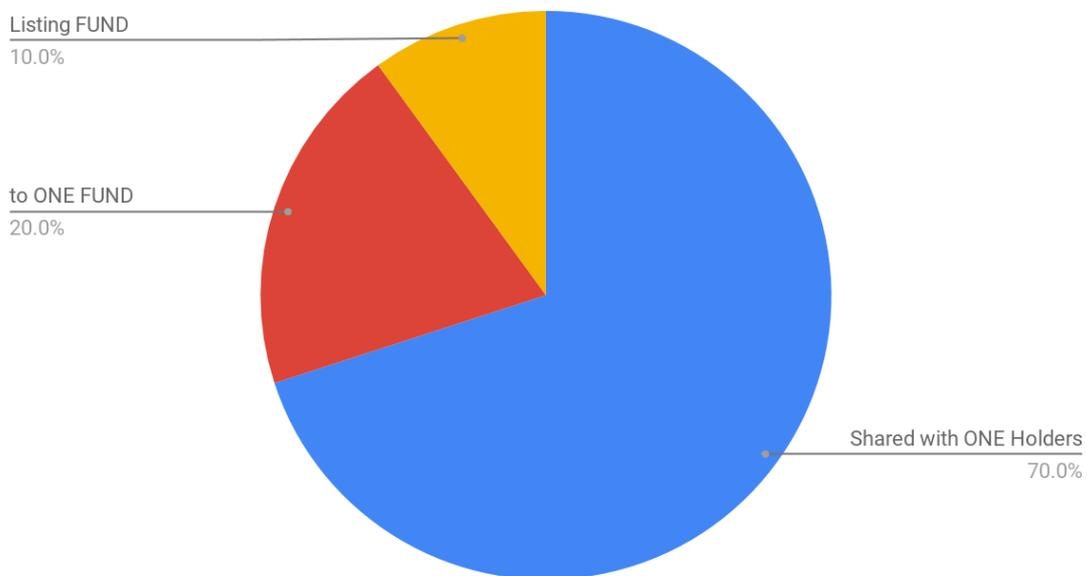

www.sketchboard.io

At end of each period of investment shareholders get back ONE SHARE tokens and a share of growth of the one fund.

➔ DISTRIBUTION OF NET INCOME

Profits will be auctioned at intervals of 3 to 4 months (may fluctuate slightly depending on the cryptocurrencies market). ONE Tokens holders will participate in the profits according to the holding group. Part of the profits will form a fund to help list ONE Token in the in the most varied and best crypto exchanges. Another part of the profits will be reinvested and be part of the ONE FUND, and make the fund grow.

DISTRIBUTION OF THE PROFITS

* The initial purpose of Distribution of the Profits can be modified by decision and by vote of SHAREHOLDERS.

* Also Part of the fund's earnings will be used for the repurchase of ONE SHARE in the exchanges whenever ONE SHARE is below the price of ICO.

➔ **LISTING FUND AND EXCHANGES** - *The more exchanges, The better.*

At each period or quarter, part of the profits, 10%, will be collected to form a fund called LISTING FUND, aims at list ONE SHARE Token in the most important exchanges.

Listing proposals in exchanges will be made within the ONE FORUM platform, prioritizing the best exchanges, with more liquidity and trust. Listing ONE token in the best exchanges is a priority objective, it helps to provide more liquidity and facilitate access to our token.

The amount of such specific funds as Listing Fund may be discussed and modified in the future in the event SHAREHOLDERS wish to prioritize the listing of the ONE SHARE Token.

New investors can at any time acquire ONE SHARE and decide HOLD to benefit from sharing profits and being able to vote.

Tokens held in exchanges are not eligible to receive gains from ONE FUND

In order to be eligible to have rights in the decisions and rights to the profits, new investors will be required to buy ONE SHARE in third parties exchanges, at the price of marking, not controlled by us, and keep them in own wallet. Tokens held in exchanges are not eligible to claim share of ONE FUND.

→ GOVERNANCE MODEL

Managing a crypto fund is not something simple, a lot needs to be considered in terms of safety and at same time profitability. In many ways crypto is a genuine market and has no comparison with stock market and others markets. A unique model of governance becomes essential.

The decisions of how to invest will always be debated and decided in ONE FORUM. A team of traders will be in charge of managing investments in the crypto securities. Balance sheets and information on how the fund is will always be disclosed daily and weekly.

We idealized three layers of governance: Fund Management Custody, Decision Management, Community Management.

ONE FUND Management custody

It concerns the safe handling of the fund. Essentially, the fund will always be held in crypto securities, even if it is a stable cryptocurrency like USDT (tether). Fund applications will be made only in safe environments and exchanges that demonstrate greater security of trust. As much as possible, the fund will be kept in cold wallets. The investments in cryptocurrencies will be carried out by the professional team of traders. The growth of the fund will be accompanied by constant disclosure and publish of gains and losses.

DECISION Management

Most of what will be done with the fund will be decided together with the SHAREHOLDERS. For this purpose, we need constant discussion and debate on ONE FORUM. Decisions will be taken by consensus. Implementing an advanced voting system will allow better decision-making and add democracy to the fund.

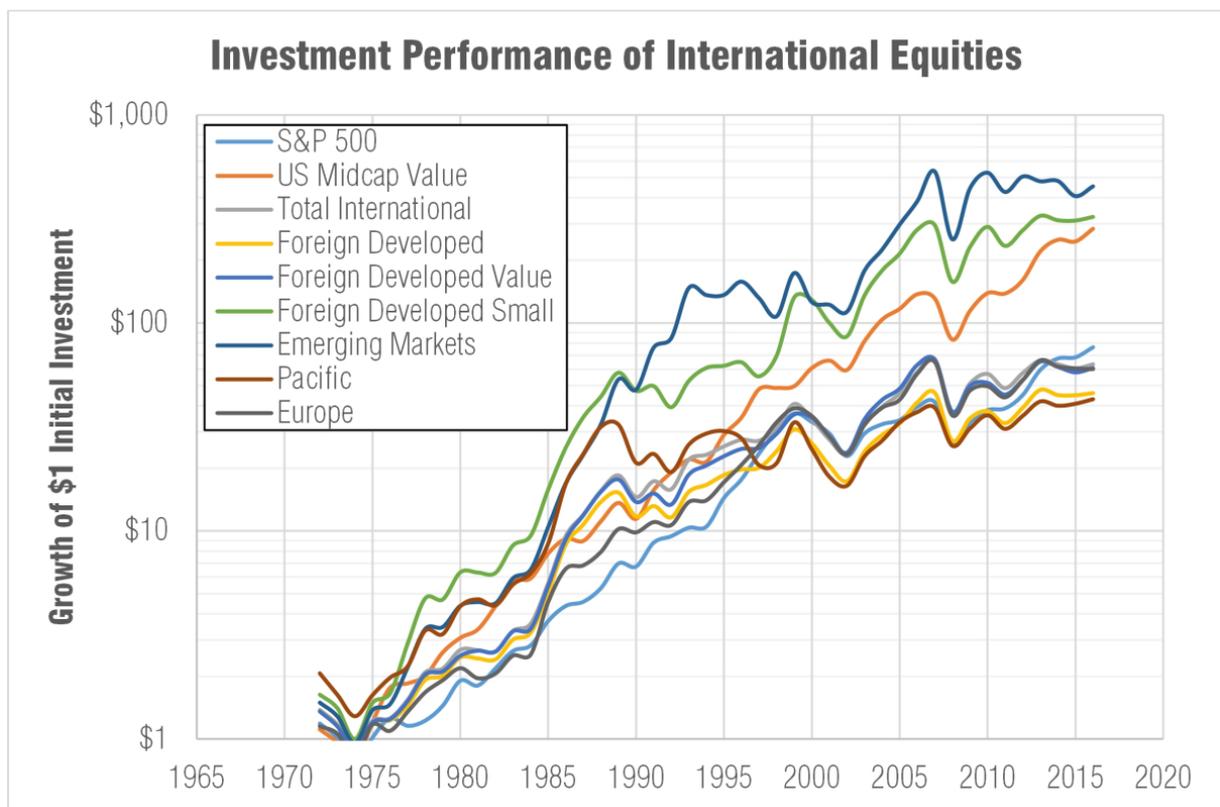

COMMUNITY Management

Proposals for new ideas and new investments, with the participation of investors, is a pillar of the success of this project. ONE FORUM will be a perfect tool for these goals.

It will require investor and employee engagement. It will be necessary to choose among the investors, some more deceived and monitors and administrators, who will moderate the progress of the ONE FORUM, organizing the propositions, voting and making of decisions. In the end, we all want the same thing, the success of the project.

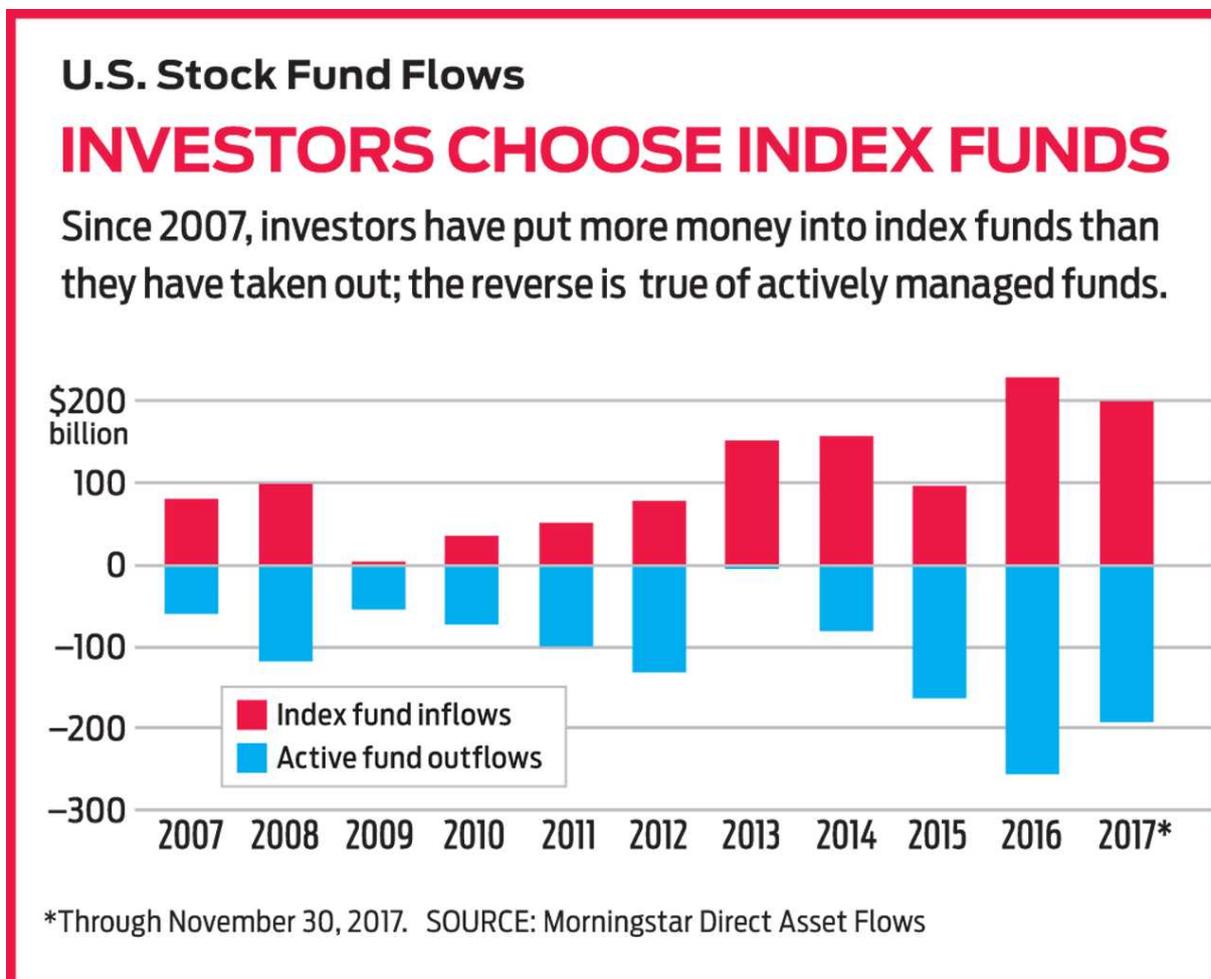

➔ ONE FUND INDEX AND THE INDEX CRYPTO EXCHANGE

INDEX investment fund is a billionaire market, as popular as equity market. An index is essentially an imaginary portfolio of securities representing a particular market or a portion of it. When most people talk about how well the market is doing, they are actually referring to an index. Some popular indexes are the Standard & Poor's 500 Index (S&P 500), the Nasdaq and the Dow Jones Industrial Average (DJIA).

It is possible to create groups of cryptocurrency portfolios that can be invested and traded as an INDEX.

The preference for investment in INDEX is based on the fact that the investor can invest in several assets and avoid to suffer the negative flow of some asset of the portfolio.

ONE FUND plans to create an INDEX INVESTMENT PLATFORM allowing direct investments in several INDEX in CRYPTO specific portfolios fund investments. investors may be able to invest in the index of the ONE FUND and others kind portfolios on a INDEX CRYPTOCURRENCY EXCHANGE.

→ STAKEHOLDERS

Identifying the agents and groups that are interested in the success of this project is a very important task. Stock Market is full of organized groups of investors who, with the intention of investing collectively, invest heavily in the market, these groups have become essential to how the stock market works, giving liquidity, volume and robustness to the system. If for some reason the large stock market funds ceased to exist, the system would go into a deep collapse. Stock Market self regulates, making successful companies perform better against companies that are failing. Crypto Market needs more stability, needs that success projects overcome bad projects. Some good crypto projects (and even profitable) should better perform against projects that are false or failed.

Although crypto are issued with the intention that this be de-facto a currency, the market more and more see crypto as an asset. When we buy a cryptocurrency, it means that we have the general feeling that we are investing in that project, in the majority of times we do not acquire these coins to buy something, but as an asset, to hold for some time. Big funds is something that lacks in Crypto Market. No doubt there are excellent blockchain projects out there that issued coins and are listed in crypto exchanges. Today the Crypto Market works unfortunately like "pump and dump".

Those who benefit most from the ONE FUND:

Crypto Market	Adding liquidity. The market lacks medium- and long-term investors or funds that are dedicated to investment in the sector.
ONE Token investors	it is expected that ONE Coin grows with success in the ONE FUND's investments, increasing interest and appreciation to the ONE Coin.
Projects in crypto and blockchain	<p>Many good crypto projects ideas die even before they start for lack of investment or how to fund themselves.</p> <p>ONE FUND is able to invest and be a partner of good ideas, exemple: A mobile application, an integration update, a web portal, a new dex application, a new tech in crypto, a crypto BOT.</p>

➔ SECURITY MEASURES FOR THE ONE FUND

With the blockchain philosophy "you are responsible for your own security," ONE FUND will maintain a secure protocol to handle the fund. ONE FUND will be fully maintained in crypto, will not be kept in centralized banks. Most of the fund will always be kept in cold wallets and as little as possible exposed to exchanges.

The funds will be managed by exclusive computers and authorized founders, Investors may be invited to participate, collaborate, after being accredited. Non accredited people will not have the private keys to control the funds. Using Cold wallets to prevent any funds from being Hacked and will only using the greatest and safest exchanges to buy in for our Portfolio Locked funds safed with smart contracts will ensure that it is impossible to get lost during the lock period , not from the team , neither from hackers that got access to your accounts.

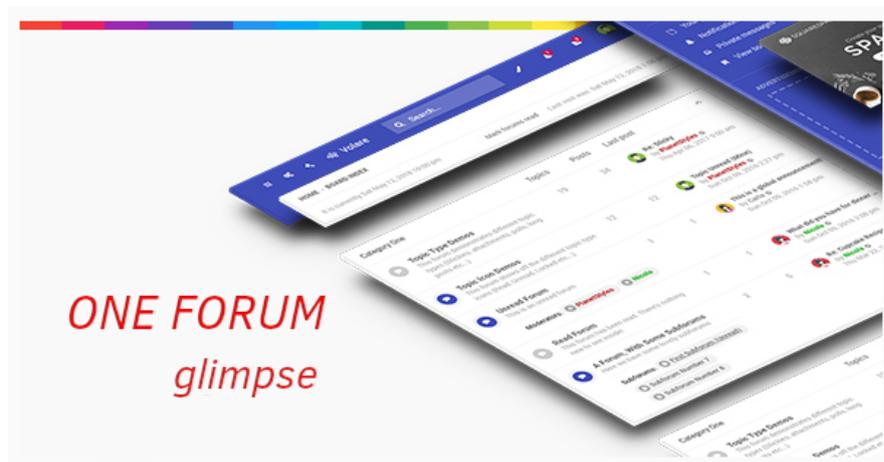

Additionally to grant Maximum security on our Website user accounts are going to be saved with 2FA authentication , email verification etc. to prevent any unwanted people gaining access to your account.

ONE FORUM:

ONE FORUM is an important tool for making strategic decisions of the hybrid Enterprise Foundation and to share information among investors. A forum with exclusive access to SHAREHOLDERS, will be integrated into the project website, as well as the ICO website. It is a place where investors can exchange ideas, suggest investments, vote on investment proposals. More than a Telegram chat, the ONE FORUM grants more organization, with specific contents separated by topics concatenated. Moderators can be chosen from volunteers with access to the forum. Proposals and decisions will be shared and taken on this platform, ROADMAP proposals will be discussed and approved.

The Voting of all decisions that matter will be conducted in the FORUM, a topic will be open to every moment a decision must be debated, for a moment will be open for debate and at end, a poll to vote will be open and the decision will be taken.

Debate - New Proposition - Exchange of Ideas - Voting - Decision

ROADMAP 2018/2019:

September/2018 ICO	Public offering of ONE SHARE Token Asset.
Q4/2018 ONE FORUM (BETA)	<p>The forum is an essential part of how shareholders will be able to exchange ideas and participate in fund's decisions. An initial version will be created during the course of ICO.</p> <p>With time we are going to add more functionally to the FORUM. It will be always a beta project.</p>
Q4/2018 ONE FUND	The foundation of the One Fund will be known at end of ICO. Here starts our journey of a decentralized E-Business.
VOTING SYSTEM Platform (BETA)	<p>Next months after the ICO, we are going to work hard on a democratic voting platform, SHAREHOLDERS will be consulted for important decisions of investments.</p> <p>Everyone holding ONE SHARE TOKEN is entitled with responsibilities and rights to decide the company's direction.</p> <p>This first platform will be just a glimpse of the most ambitious project of taking polls on chain of a decentralized blockchain ecosystem.</p>
End of Q4/2018 DISTRIBUTION OF FIRST NET INCOME	<p>The total of realized profit earned from ONE FUND applications of Q4 will be disclosed and the corresponding gains published and delivered to each of one that participated in the ICO.</p> <p>At this stage, only ICOs investors will take part of the profits.</p> <p>The Net Income will be always distributed at end of each quarter. Next quarters will</p>

	<p>be required, in order to be entitled in the realized profits, to HOLD ONE SHARE TOKENS in a private wallet.</p>
<p>Q1/2019 SHAREHOLDER PROTOCOL</p>	<p>After the first Distribution of Net Income to ICO investors, to have a share in the ONE FUND's decisions/gains, will be required to Hold ONE SHARE Token in a private wallet.</p> <p>SHAREHOLDER PROTOCOL establishes the duality of ONE SHARE Token, a cryptocurrency and also an crypto Asset stock to be traded in market and represents the ownership share of One Fund.</p>
<p>Q2/2019 ONE FUND INDEX ETF EXCHANGE PLATFORM PORTFOLIO TRADE</p>	<p>Ambitious project starting in 2019, to create an investment platform for trading cryptocurrency portfolios. The parameters will be will be a product of constant debate in our Forum.</p>
<p>Q4/2019 The most ADVANCED DApp Voting Platform of Decision-Making in BlockChain. A revolution in how to conduct a public opinion poll.</p>	<p>It will be our most important project to be developed, an unique DApp platform system in blockchain for conducting searches, inquiry, study, polls by voting.</p> <p>this platform has a range of practical applications, strategic decisions to be taken by a company, opinion polls for the most diverse surveys situations.</p> <p>This platform will help manage a hybrid and decentralized governance company.</p>

By João C M de Almeida,
and Deniz Yildiz
